OBJECTIVE

Aspiring full-stack web developer seeking an internship to apply and enhance skills in front-end and back-end development. Proficient in HTML, CSS, JavaScript, Bootstrap, PHP, and Python, with experience in database management (MySQL), version control (Git/GitHub), and API integration. Passionate about problem-solving, software development, and continuous learning in a dynamic tech environment.

SKILLS & ABILITIES

- Proficient in front-end development (HTML, CSS, Bootstrap, JavaScript)
- Experienced in back-end development with PHP and MySQL
- Knowledgeable in Python programming and API integration
- Familiar with version control using Git/GitHub
- Strong problem-solving and debugging skills
- Ability to work collaboratively in a team environment
- Adaptable and eager to learn new technologies

ACADEMIC PROJECTS

Website Development Projects

Developed websites showcasing proficiency in web development and API integration. Focused on responsiveness and overall quality.

Task Management System

Created a task management system with client and admin sides. Admin side provides tasks for clients to work on, ensuring streamlined workflow.

PUPiL- Online Library System

Developed an online library system where I focused on backend development, contributing to front-end work as well to ensure seamless functionality.

CALC - Computational Assistance and Learning Companion

Lead developer of an AI-based application using Python and the Gemini API. CALC assists with computational tasks and learning, showcasing advanced programming and AI integration skills.
